

PROBLEM SOLVER

Many Customers Have Experienced The Following:

PROBLEM:

Cutting Copper Stranded Cable

- Regular side cutters will not cut large cable
- Cutting with a hacksaw is time-consuming, requires a vise and leaves badly-frayed ends

SOLUTION:

Copper Cable Cutters

- Easily cuts copper cable up to 4/0 Ga. Large size cuts up to 500 MCM cable (see Electrical section for large size copper cable cutter)
- Quickly cuts cable – no extra tools required
- Cuts cable cleanly, leaving no frayed ends

“Let me show you how it works”

FEATURES:

- Constructed from high-carbon hardened steel
- Cushion-grip handles for comfort and control
- Cutter head on the large cable cutter is replaceable

APPLICATIONS:

- Cuts copper battery cable, heavy gauge industrial electrical cable, service cord and bundled wires
- Used by mechanics, electricians, maintenance personnel, installers and demolition personnel
