

PROBLEM SOLVER

Many Customers Have Experienced The Following:

DRUMMOND™
A LAWSON BRAND

PROBLEM:

Glass cleaners leave streaks and have an unpleasant ammonia smell

- Most glass cleaners run and do not stay in place
- Streak marks are left behind, requiring additional cleaning
- Glass appears hazy after wiping cleaner off
- Strong smell of ammonia is unpleasant and can cause dizziness

SOLUTION:

Ogle Glass and Hard Surface Cleaner

- Cleansing foam stays in place and clings to glass
- Leaves surfaces streak-free with no hazy film
- Lifts off dirt, fingerprints, smoke films, grease and most other soils
- Can also be used on a variety of hard surfaces such as glass, stainless steel and mirrors
- Light, pleasant, fresh fragrance

Available in aerosol or liquid quart bottle

“Let me show you how it works”

APPLICATIONS:

- Ideal for cleaning glass, mirrors and stainless steel
- Cleans any non-porous hard surface
- Spray directly on surface and allow for wetting before wiping away
- Wipe away with a film-free cloth, towel or rag
