

PROBLEM SOLVER

Many Customers Have Experienced The Following:

DRUMMOND™
A LAWSON BRAND

PROBLEM:

Looking for a cleaner that is better for the environment, safer to use and is an effective cleaner

- Finding a safe, yet effective cleaning compound that does not cause skin irritation or trigger allergic reactions
- Cleaners that contain toxic chemicals, carcinogens or other harmful compounds
- Cleaners that contribute to smog formation and harm marine life and waterways
- Cleaners that use wasteful packaging which results in added landfill pressure and consumes non-renewable resources
- Excessive shipping costs for heavy, difficult-to-handle 55 gallon drums of cleaning compounds

SOLUTION:

Drummond's Third Power™ Cleaner Degreaser

- Highly-effective Third Power™ quickly breaks down tough grease, oils and grime – surfaces rinse clean and residue free
- Non-toxic and free of carcinogens, teratogens or mutagens
- Safe to use – carries a “minimal” HMIS rating of 0,0,0 (the safest level) in the categories of health, flammability and reactivity
- Environmentally friendly – contains no phosphates or marine pollutants harmful to waterways, plant and animal life
- Third Power™ super concentrate **reduces** shipping weight by as much as 80%, reducing freight costs and energy used in shipment
- Supplied as a super concentrate – drums are **reused** by adding concentrate and water on site, minimizing the carbon footprint resulting from pollutants and energy used in drum manufacturing
- Replenishment concentrate is shipped in entirely **recyclable** packaging which conserves non-renewable resources

“Let me show you how it works”

The safer choice for cleaning and degreasing

APPLICATIONS:

- Machinery, workstations and concrete floors
- Cabinets, tool boxes and counters
- Removes bugs and road grime from wheels, bumpers and grilles
- Vehicle interiors – vinyl or leather upholstery, dashboards, floor mats and carpeting
- Food processing equipment and surfaces
- Floors, walls, ceilings, stainless steel countertops and tiled surfaces
- Off-road construction equipment, forklifts and machine shop equipment

Highly versatile – may be applied by using pressure washers, floor scrubbing machines, tank sprayers, mops or trigger sprayers.

The U.S. EPA recommends the practice of Reduce, Reuse and Recycle as a way to minimize adverse environment impact.
