

PROBLEM SOLVER

Many Customers Have Experienced The Following:

PROBLEM:

Corrosion

- Caused from exposed battery terminal connections
- Abrasion of cable insulation
- Cable exposed when insulation pulls away from terminal

SOLUTION:

Lawson's Tru-Shrink® Heavy Wall Heat Shrink Tubing

- Encapsulates and insulates simultaneously
- Protects connection from oxidation
- Resistant to abrasion and chemicals
- Provides strain relief and prevents insulation from pulling away from the terminal
- Three sizes cover 18 Ga. wire to 4/0 cable

"Let me show you how it works"

FEATURES:

- 3-to-1 shrink ratio: Covers a wide range of wire sizes and terminal shapes
- Heat-activated inner wall surrounds and adheres to materials to yield a watertight seal
- Wide range of sizes and lengths
- Excellent abrasion resistance
- Remains flexible at low temperature: Four hours at -67°F (-55°C)
- Rated to 600V

APPLICATIONS:

- Automotive
- Trucking
- Utilities
- Industrial
- Marine
