

PROBLEM SOLVER

Many Customers Have Experienced The Following:

PROBLEM:

With Standard Insulated Electrical Terminals

- Connections can get exposed to moisture and contaminants
- Color-coded insulators can hinder the view of the crimped connection
- Loose wires and poor tensile strength

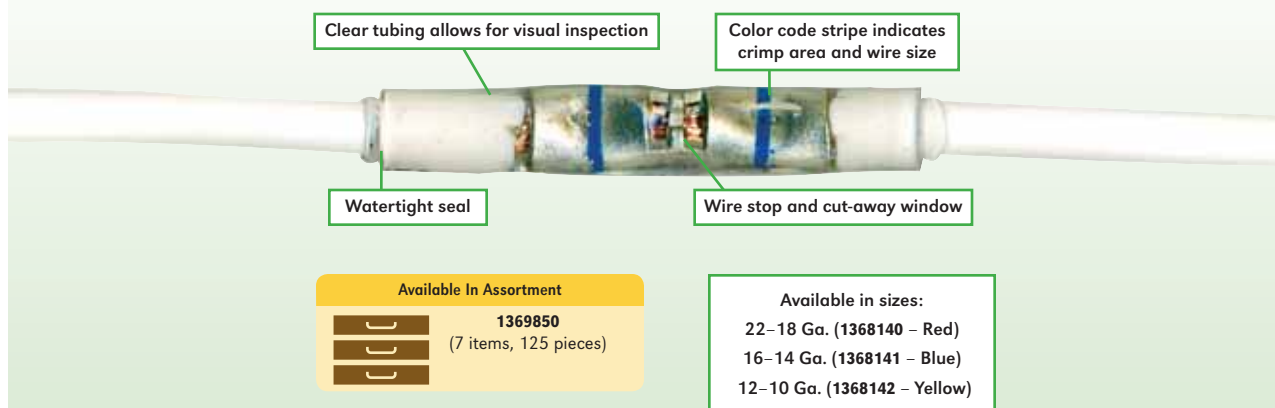

SOLUTION:

Visa Seal Crimp and Heat Seal Connectors

- Adhesive-lined heat shrink tubing to protect against moisture and corrosion
- Unique Crystal Clear™ tubing allows visual inspection of wire strip length, wire insertion and crimp
- Heat shrink provides wire strain relief and protects connections exposed to high vibration

“Let me show you how it works”

FEATURES:

- Crimp and heat seal for unsurpassed strength
- Seamless barrel with wire stop and cut-away window ensures proper wire seating
- Color code stripe on barrel to indicate proper nest and placement of crimp
- Adhesive-lined tubing for a watertight seal

APPLICATIONS:

- Wire harness assembly and repair
- Wire splices
- Fleet and automotive
- Construction, mining, agriculture and heavy equipment
- Marine
